SUMMARY

AI Engineer with 2+ years building production **Multiagent** systems, **LLM fine-tuning pipelines**, and real-time AI infrastructure. Experienced across the full stack — from transformer internals to cloud deployment. Currently building TaxVantage AI, **an agentic OCR** + report generation product with **MCP integration**.

EXPERIENCE

OCCAMS-ADVISORY

AI Software Engineer

Sept 2025 - present

Delhi, India

- Created and maintained **high-quality prompt data** across multiple domains to train and enhance LLM performance, ensuring grammatical accuracy and contextual consistency for **IncubationAI**.
- Leveraged **Python** to automate and optimize data processing workflows, improving efficiency and reducing manual intervention in AI tool execution.
- **Interpreted technical documentation** and business logic to design accurate prompt behaviors, resolving ambiguous cases through analytical problem-solving.
- Identified and mitigated **AI hallucinations and tooling inconsistencies**, contributing to improved data quality and model reliability across services.
- Architected **TaxVantage AI** — a **multiagent OCR** pipeline that intelligently processes user and company financial documents, generates structured tax study reports, and exposes a **production MCP** server for standardized client access.
- Built **agentic LinkedIn** scraping workflows (n8n + Python) that extract prospect and company data to generate and dispatch hyper-personalized outreach emails at scale.
- Engineered an inbound/outbound **Voice AI agent** for automated customer pitching, integrating real-time speech, LLM reasoning, and CRM-ready output.
- Designed and deployed multiagent systems using **OpenAI Agents SDK**, coordinating specialized sub-agents for document parsing, reasoning, and report synthesis.

WEBUILDTECH

AI Engineer

June 2025 - Sept 2025

Gurugram, India

- Spearheaded **video generation (Gemini VEO3, Vertex AI)** for EdTech, creating intelligent content workflows.
- Developed ML model for user-centric **YouTube playlists (YouTube Data API)**, optimizing content delivery via Supabase.
- Leveraged **Claude (image gen) & OpenAI (widget gen)** with advanced prompt engineering for interactive learning.
- Designed & implemented robust cloud infrastructure (**Cloudflare, Firestore, Firebase**) for real-time EdTech data.
- Engineered secure banking integrations & seamless **API backend for financial** operations (Python, Supabase).
- Enhanced **open-source model inference**, reducing latency for **Fintech APIs**; developed robust Python/Supabase backend.
- Curated custom MCP servers, **integrated AI**, which enhanced their accuracy by **50%**, **developed POCs managed** standalone.

KIDJIG

AI Engineer

Jan 2025 – April 2025

remote, India

- Built ML models (RAG Agent, Form Agent) using **LangChain, LLMs, and Classical ML**.
- Integrated AI/ML models into batch and real-time flows using **FastAPI, Docker, MongoDB**.
- Led Llama3.2-1B model fine-tuning; maintained detailed model and deployment documentation.
- Built Gen-AI products for the client by using **LangGraph, Langchain**.
- Built form automation using **playwright, python, langchain, docker**.

FREELANCER

AI Engineer

Oct 2023 – Dec 2024

remote, India

- Delivered customized AI solutions for dynamic web applications based on client requirements.
- Deployed ML models in production environments with optimized backend systems.

BRIMO SOFTWARE SOLUTIONS

SDE-1

April 2023 – Sept 2023

Lucknow, UP

- Optimized data flows for dashboards processing 2000+ monthly transactions.
- Strengthened backend APIs integration via CI/CD pipelines and GitHub.
- Improved latency of the site by 30% and hassle free integration of the backend, implemented queues, loadbalancing etc.

PROJECTS

[MailIt-Mailing_refined](#) | *Langchain, ChromaDB , pypdf, Ollama embeddings, fastapi, groq, nextjs*. Dec 2024 – Jan 2025

- Built real-time intelligent mailing platform using LangChain, FastAPI, ChromaDB.
- Designed NLP pipelines for resume skill extraction and personalized emailing.

[WhatsApp-Analyzer](#) | *Langchain, ChromaDB , pypdf, Ollama embeddings, llama3.2*. Dec 2024 – Dec 2024

- Developed NLP platform to analyze and summarize chat data using LangChain, Ollama embeddings.
- Deployed application via Streamlit ensuring modular architecture.

TECHNICAL SKILLS

Languages: Python, TypeScript, Java, SQL

AI/ML Frameworks: LangChain, LangGraph, OpenAI Agents, CrewAI, Transformers, CatBoost, XGBoost, LightGBM, Classical ML, NLP

LLMs & GenAI: Llama, Mistral, Claude, Gemini VEO3, RAG, Fine-tuning, MCP

Infrastructure: FastAPI, Docker, Firebase, Supabase, Cloudflare, GCP, AWS

Automation: n8n, Playwright, Selenium

Tools: Git, VS Code, React.js, MongoDB, ChromaDB

EDUCATION

Babu Banarsi Das University
Bachelor of Technology (CSE)

Lucknow-UP
8.9 CGPA
